

*Providing medical care to foreign citizens in the Clinical emergency hospital
named after N. V. Solovyov*

About us

The Clinical emergency hospital named after N. V. Solovyov is the oldest medical institution in Yaroslavl region and has more than 230 years of surgical experience. Currently, it is a modern medical institution that provides specialized and high-tech medical care in the field of traumatology and orthopedics, as well as having the osteoporosis center, which introduced the first Russian secondary fracture prevention service.

Endoprosthesis and arthroscopic reconstructive operations on the knee, hip, shoulder and elbow joints are at a modern level using recognized world manufacturers' equipment and consumables.

Thanks to large accumulated experience, fine surgical technique, modern equipment, multidisciplinary approach and the possibility of interaction of multidirectional specialists, many of whom are leaders in their areas, we provide consistently high-quality medical care.

List of medical services

Department of joint replacement and arthroscopy:

- replacement of knee, hip, shoulder and elbow joints
- arthroscopic reconstructive operations on various joints

Since its organization the Department has been actively engaged in surgical activities, providing medical care to patients with hip fractures, injuries and diseases of the hip, knee and the shoulder joints. Operations are performed to replace large joints on patients with arthrosis of any stage.

Orthopedic traumatologists work in close cooperation with rheumatologists of the osteoporosis center, this allows us to assess the state of the bone system in a complex. The specialists of the center conduct examination for osteoporosis, determine bone mineral density. The examination is performed using x-ray osteodensitometry and a wide spectrum of laboratory research.

Department of hand surgery, reconstructive and plastic surgery.

The specialists of the department provide assistance for injuries of the upper limb from ordinary damage to severe destruction requiring complex recovery operations, up to the replantation of detached segments of the hand.

Another area of work is reconstructive surgery on injuries consequences:

- inveterate damage to tendons and nerves, rough tightening scars
- reconstructive operations on absent fingers
- operation on incorrectly consolidated or non-consolidated fractures of the forearm bones
- congenital deformity of the hand
- arthroscopic restoration of the shoulder joint
- arthroplasty of the elbow joint

The Department is one of the centers accredited by Federation of the European Societies for the Surgery of the Hand (FESSH).

The department's doctors are members of Russian Society of Hand Surgeons and Federation of the European Societies for the Surgery of the Hand (FESSH) and International Federation of Society for Surgery of the Hand (IFSSH).
